

The Department of Computing Sciences at the University of Hartford is looking for instructors to teach CS 110 this fall.

CS 110 - Introduction to Computers 3 credit(s)

This course focuses on computer concepts and skills for non-science majors. Computer concepts refers to 1) fundamental knowledge about computer components and how they work, 2) digital representation of information including data, sound, graphics, and video, and 3) the foundations of communication and network infrastructure. The course will form a basis for problem solving skills that evolve and adapt as technology advances. Students will also master advanced skills in word processing, spreadsheet creation, and presentation software, among other applications. Not open to Computer Science majors.

We currently have three sections open for the fall:

- MWF 10:30-11:20
- MWF 12:30-13:20
- TR 9:25-10:40

If interested, please send inquiries to Dr. Rosiene.
